Dr. Mauricio Herrera is a highly regarded Consultant Specialist Obstetrician Gynecologist with expertise in Maternal-Fetal Medicine, Fetal Surgery and Therapy, Fetal Cardiology, and Fetal Neurology. With decades of experience, he is recognized globally as a leading expert in maternal-fetal health and advanced surgical interventions.

At Burjeel Hospital and Burjeel Medical City, Dr. Herrera serves as the Chief Medical Officer and Head of the Maternal-Fetal Medicine Department. In this role, he leads initiatives in maternal-fetal medicine, concentrating on complex cases, congenital anomalies, and innovative diagnostic techniques.

Additionally, Dr. Herrera has held the position of Director and Head of the Maternal-Fetal Department at Colsanitas Clinic – Keralty Holdings since 2001.

Dr. Herrera serves as the director of the International Center for Fetal Surgery and Therapy, which is a referral center for validated fetal surgeries and therapies. Each year, he oversees more than 130 cases involving patients from various regions in Colombia, as well as from other countries in Latin America. Additionally, he holds the position of President of the Maternal-Fetal Medicine Foundation.

He dedicates all the time for the Maternal Fetal Medicine, Prenatal Diagnosis and Fetal therapy and surgery.

CV Bio – MHM 2025

Dr. Herrera began his career in Maternal-Fetal Medicine and Prenatal Diagnosis in 2000 when he established the Maternal-Fetal Unit at Colsanitas Clinic. He also initiated the first accredited fellowship program in Maternal-Fetal Medicine in Colombia at the University of Rosario School of Medicine. Currently, he serves as the Director of the Fellowship Program in Maternal-Fetal Medicine, Fetal Cardiology, and Fetal Neurology at both Sanitas University and Rosario University.

Since 2006, Dr. Herrera has been a member of the Educational Committee of the International Society of Ultrasound in Obstetrics and Gynecology (ISUOG), leveraging his expertise to advance educational efforts across Latin America. He served on the ISUOG Board from 2014 to 2019 and holds a lifetime position as an ISUOG Fellow and Advisory Member.

Dr. Herrera developed the Fellows Program in Fetal Cardiology and Neurology, through which over 900 physicians have completed their training. He is also the creator and director of the Advanced Fetal Medicine Internet Network, which has registered over 6,000 doctors globally. As the founder and lead of the Latino American Center for Fetal Surgery and Therapy, Dr. Herrera performs more than 130 fetal surgeries each year, including procedures for myelomeningocele, twin surgeries, fetal tumors, fetal shunts, EXIT procedures, and fetal tracheal occlusion, among more than 17 other interventions.

He is recognized as an opinion leader in obstetrical and gynecological ultrasound, prenatal diagnosis, fetal ultrasound, screening for fetal malformations, and fetal surgery and therapy.

In addition to publishing numerous articles and abstracts, Dr. Herrera is a sought-after speaker at various meetings, courses, and medical congresses in Colombia and internationally. Each year, he travels over 105,000 miles worldwide to promote education in ultrasound, prenatal diagnosis, prenatal biochemical screening, maternal-fetal health, and related technologies.
