

Dr. Elisenda Eixarch is a fetal medicine specialist and researcher with a strong focus on fetal neurology. She works as a consultant at BCNatal (Hospital Sant Joan de Déu and Hospital Clínic in Barcelona) and she leads the research lines in fetal brain development and fetal therapy and surgery. Dr. Eixarch combines clinical expertise in neurosonography with advanced neuroimaging techniques to better understand how adverse intrauterine conditions affect neurodevelopmental outcomes. She has also worked in the development of new solutions in fetal therapy and surgery. She has authored more than 170 scientific publications and is actively involved in international research networks.
