

Professor Rick Leventer is a pediatric neurologist at the Royal Children's Hospital in Melbourne, Australia and Team Leader of Neurogenetics in the Murdoch Children's Research Institute. He leads the RCH/MCRI Brain Development Program, the RCH/MCRI Neurodevelopment Flagship and is Clinical Lead of the Australian Leukodystrophy Clinical and Research Program. His main clinical and research interests are disorders of early brain development and the use of imaging and genomic technologies to understand their causes in order to develop better treatments.
